

Columbus, the Indians, and Human Progress

Arawak men and women, naked, tawny, and full of wonder, emerged from their villages onto the island's beaches and swam out to get a closer look at the strange big boat. When Columbus and his sailors came ashore, carrying swords, speaking oddly, the Arawaks ran to greet them, brought them food, water, gifts. He later wrote of this in his log:

They...brought us parrots and balls of cotton and spears and many other things, which they exchanged for the glass beads and hawks' bells. They willingly traded everything they owned.... They were well-built, with good bodies and handsome features.... They do not bear arms, and do not know them, for I showed them a sword, they took it by the edge and cut themselves out of ignorance. They have no iron. Their spears are made of cane.... They would make fine servants.... With fifty men we could subjugate them all and make them do whatever we want.

These Arawaks of the Bahama Islands were much like Indians on the mainland, who were remarkable (European observers were to say again and again) for their hospitality, their belief in sharing. These traits did not stand out in Renaissance Europe, dominated as it was by the religion of popes, the government of kings, the frenzy for money that marked Western civilization and its first messenger to the Americas, Christopher Columbus.

Columbus wrote:

Columbus, the Indians, and Human Progress

As soon as I arrived in the Indies, on the first Indies, on the first Island which I found, I took some of the natives by force in order that they might learn and might give me information of whatever there is in these parts.

The information that Columbus wanted most was: Where is the gold? He had persuaded the king and queen of Spain to finance an expedition to the lands, the wealth, he expected would be on the other side of the Atlantic—the Indies and Asia, gold and spices. For, like other informed people of his time, he knew the world was round and that he could sail west in order to get to the Far East.

Spain was recently unified, one of the new modern nation-states, like France, England, and Portugal. Spain's population, mostly poor peasants, worked for the nobility, who were 2 percent of the population and owned 95 percent of the land. Spain had tied itself to the Catholic Church, expelled all the Jews, driven out the Moors. Like other states of the modern world, Spain sought gold, which was becoming the new mark of wealth, more useful than land because it could buy anything.

There was gold in Asia, it was thought, and certainly silks and spices, for Marco Polo and others had brought back marvelous things from their overland expeditions centuries before. Now that the Turks had conquered Constantinople and the eastern Mediterranean, and controlled the land routes to Asia, a sea route was needed. Portuguese sailors were working their way around the southern tip of Africa. Spain decided to gamble on a long sail across an unknown ocean.

In return for bringing back gold and spices, Ferdinand and Isabella promised Columbus 10 percent of the profits, governorship over new-found lands, and the fame that would go with a new title: Admiral of the Ocean Sea. He was a merchant's clerk from the Italian city of Genoa, part-time weaver (the son of a skilled weaver), and expert sailor. He set out with three sailing ships; the largest of which was the *Santa María*, perhaps one hundred feet long, and with thirty-nine crew members.

Columbus would never have made it to Asia, which was thousands of miles farther away than he had calculated, imagining a smaller world. He would have been doomed by that great expanse of sea. But he was lucky. One-fourth of the way there he came upon an unknown, uncharted land that lay between Europe and Asia—the Americas. It was early October 1492, thirty-three days since he and his crew had left the Canary Islands, off the Atlantic coast of Africa. Now they saw branches and sticks floating

in the water. They saw flocks of birds. These were signs of land. Then, on October 12, a sailor called Rodrigo saw the early morning moon shining on white sands, and cried out. It was an island in the Bahamas, the Caribbean sea. The first man to sight land was supposed to get a yearly pension of ten thousand maravedis for life, but Rodrigo never got it. Columbus claimed he had seen a light the evening before. He got the reward.

So, approaching land, they were met by the Arawak Indians, who swam out to greet them. The Arawaks lived in village communes, had a developed agriculture of corn, yams, cassava. They could spin and weave, but they had no horses or work animals. They had no iron, but they wore tiny gold ornaments in their ears.

This was to have enormous consequences: it led Columbus to take some of them aboard ship as prisoners because he insisted that they guide him to the source of the gold. He then sailed to what is now Cuba, then to Hispaniola (the island that today consists of Haiti and the Dominican Republic). There, bits of visible gold in the rivers, and a gold mask presented to Columbus by a local Indian chief, led to wild visions of gold fields.

On Hispaniola, out of timbers from the *Santa María*, which had run aground, Columbus built a fort, the first European military base in the Western Hemisphere. He called it Navidad (Christmas) and left thirty-nine crew members there, with instructions to find and store the gold. He took more Indian prisoners and put them aboard his two remaining ships. At one part of the island he got into a fight with Indians who refused to trade as many bows and arrows as he and his men wanted. Two Arawaks were run through with swords and bled to death. Then the *Niña* and the *Pinta* set sail for the Azores and Spain. When the weather turned cold, the Indian prisoners began to die.

Columbus's report to the royal court in Madrid was extravagant. He insisted he had reached Asia (it was Cuba) and an island off the coast of China (Hispaniola). His descriptions were part fact, part fiction:

Hispaniola is a miracle. Mountains and hills, plains and pastures, are both fertile and beautiful...the harbors are unbelievably good and there are many wide rivers of which the majority contain gold.... There are many spices, and great mines of gold and other metals....

The Indians, Columbus reported, "are so naive and so free with their possessions that no one who has not witnessed them would believe it.

Columbus, the Indians, and Human Progress

When you ask for something they have, they never say no. To the contrary, they offer to share with anyone. . . .” He concluded his report by asking for a little help from their Majesties, and in return he would bring them from his next voyage “as much gold as they need. . . and as many slaves as they ask.” He was full of religious talk: “Thus the eternal God, our Lord, gives victory to those who follow His way over apparent impossibilities.”

Because of Columbus’s exaggerated report and promises, his second expedition was given seventeen ships and more than twelve hundred men. The aim was clear: slaves and gold. They went from island to island in the Caribbean, taking Indians as captives. But as word spread of the Europeans’ intent they found more and more empty villages. On Haiti, they found that the sailors left behind at Fort Navidad had been killed in a battle with the Indians, after they had roamed the island in gangs looking for gold, taking women and children as slaves for sex and labor.

Now, from his base on Haiti, Columbus sent expedition after expedition into the interior. They found no gold fields, but had to fill up the ships returning to Spain with some kind of dividend. In the year 1495, they went on a great slave raid, rounded up fifteen hundred Arawak men, women, and children, put them in pens guarded by Spaniards and dogs, then picked the five hundred best specimens to load onto ships. Of those five hundred, two hundred died en route. The rest arrived alive in Spain and were put up for sale by the archdeacon of the town, who reported that, although the slaves were “naked as the day they were born,” they showed “no more embarrassment than animals.” Columbus later wrote: “Let us in the name of the Holy Trinity go on sending all the slaves that can be sold.”

But too many of the slaves died in captivity. And so Columbus, desperate to pay back dividends to those who had invested, had to make good his promise to fill the ships with gold. In the province of Cicao on Haiti, where he and his men imagined huge gold fields to exist, they ordered all persons fourteen years or older to collect a certain quantity of gold every three months. When they brought it, they were given copper tokens to hang around their necks. Indians found without a copper token had their hands cut off and bled to death.

The Indians had been given an impossible task. The only gold around was bits of dust garnered from the streams. So they fled, were hunted down with dogs, and were killed.

Trying to put together an army of resistance, the Arawaks faced Spaniards who had armor, muskets, swords, and horses. When the Spaniards took prisoners, they hanged them or burned them to death.

A People's History of the United States

Among the Arawaks, mass suicides began, with cassava poison. Infants were killed to “save” them from the Spaniards. In two years, through murder, mutilation, or suicide, half of the two hundred fifty thousand Indians on Haiti were dead.

When it became clear that there was no gold left, the Indians were taken as slave labor on huge estates, known later as *encomiendas*. They were worked at a ferocious pace, and died by the thousands. By the year 1515, there were perhaps fifty thousand Indians left. By 1550, there were five hundred. A report of the year 1650 shows none of the original Arawaks or their descendants left on the island.

The chief source—and, on many matters, the only source—of information about what happened on the islands after Columbus came is Bartolomé de las Casas, who, as a young priest, participated in the conquest of Cuba. For a time he owned a plantation on which Indian slaves worked, but he gave that up and became a vehement critic of Spanish cruelty. Las Casas transcribed Columbus’s journal and, in his fifties, began a multivolume *History of the Indies*.

Women in Indian society were treated so well as to startle the Spaniards. Las Casas describes sex relations:

Marriage laws are nonexistent: men and women alike choose their mates and leave them as they please, without offense, jealousy or anger. They multiply in great abundance; pregnant women work to the last minute and give birth almost painlessly; up the next day, they bathe in the river and are as clean and healthy as before giving birth. If they tire of their men, they give themselves abortions with herbs that force stillbirths, covering their shameful parts with leaves or cotton cloth; although on the whole, Indian men and women look upon total nakedness with as much casualness as we look upon a man’s head or at his hands.

The Indians, Las Casas says, “put no value on gold and other precious things. They lack all manner of commerce, neither buying nor selling, and rely exclusively on their natural environment for maintenance. They are extremely generous with their possessions and by the same token covet the possessions of their friends and expect the same degree of liberality....”

Las Casas tells about the treatment of the Indians by the Spaniards.

Endless testimonies...prove the mild and pacific temperament of the natives.... But our work was to exasperate, ravage, kill, mangle and destroy; small wonder, then, if they tried to kill one of us now and then.... The admiral, it is true, was blind as those who came after him,

Columbus, the Indians, and Human Progress

and he was so anxious to please the King that he committed irreparable crimes against the Indians....

Total control led to total cruelty. The Spaniards “thought nothing of knifing Indians by tens and twenties and of cutting slices off them to test the sharpness of their blades.” Las Casas tells how “two of these so-called Christians met two Indian boys one day, each carrying a parrot; they took the parrots and for fun beheaded the boys.”

While the native men were sent many miles away to the mines, their wives remained to work the soil, forced into the excruciating job of digging and making thousands of hills for cassava plants.

Thus husbands and wives were together only once every eight or ten months and when they met they were so exhausted and depressed on both sides...they ceased to procreate. As for the newly born, they died early because their mothers, overworked and famished, had no milk to nurse them, and for this reason, while I was in Cuba, 7,000 children died in three months. Some mothers even drowned their babies from sheer desperation.... In this way, husbands died in the mines, wives died at work, and children died from lack of milk...and in a short time this land which was so great, so powerful and fertile...was depopulated.... My eyes have seen these acts so foreign to human nature, and now I tremble as I write....

When he arrived on Hispaniola in 1508, Las Casas says, “there were 60,000 people living on this island, including the Indians; so that from 1494 to 1508, over three million people had perished from war, slavery, and the mines. Who in future generations will believe this?”

Thus began the history, five hundred years ago, of the European invasion of the Indian settlements in the Americas, a history of conquest, slavery, and death. But in the history books given to children in the United States, for generation after generation, it all starts with heroic adventure—there is no bloodshed—and Columbus Day is a celebration. Only in recent years do we see droplets of change.

Past the elementary and high schools, there have been only occasional hints of something else. Samuel Eliot Morison, the Harvard historian, was the most distinguished writer on Columbus, the author of a multivolume biography, and was himself a sailor who retraced Columbus’s route across the Atlantic. In his popular book *Christopher Columbus, Mariner*, written in 1954, he tells about the enslavement and the killing: “The cruel policy initiated by Columbus and pursued by his successors resulted in complete genocide.”

A People's History of the United States

That is on one page, buried halfway into the telling of a grand romance. In the book's last paragraph, Morison sums up his view of Columbus:

He had his faults and his defects, but they were largely the defects of the qualities that made him great—his indomitable will, his superb faith in God and in his own mission as the Christ-bearer to lands beyond the seas, his stubborn persistence despite neglect, poverty and discouragement. But there was no flaw, no dark side to the most outstanding and essential of all his qualities—his seamanship.

One can lie outright about the past. Or one can omit facts which might lead to unacceptable conclusions. Morison does neither. He refuses to lie about Columbus. He does not omit the story of mass murder; indeed he describes it with the harshest word one can use: genocide.

But he does something else. He mentions the truth quickly and goes on to other things more important to him. Outright lying or quiet omission takes the risk of discovery, which, when made, might arouse the reader to rebel against the writer. To state the facts, however, and then to bury them in a mass of other information is to say to the reader with a certain infectious calm: yes, mass murder took place, but it's not that important—it should weigh very little in our final judgments; it should affect very little what we do in the world.

It is true that the historian cannot avoid emphasis of some facts and not of others. This is as natural to him as to the mapmaker, who, in order to produce a usable drawing for practical purposes, must first flatten and distort the shape of the earth, then choose out of the bewildering mass of geographic information those things needed for the purpose of this or that particular map.

My argument cannot be against selection, simplification, or emphasis, which are inevitable for both cartographers and historians. But the mapmaker's distortion is a technical necessity for a common purpose shared by all people who need maps. The historian's distortion is more than technical, it is ideological; it is released into a world of contending interests, where any chosen emphasis supports (whether the historian means to or not) some kind of interest, whether economic or political or racial or national or sexual.

Furthermore, this ideological interest is not openly expressed in the way a mapmaker's technical interest is obvious ("This is a Mercator projection for long-range navigation—for short-range, you'd better use a different projection"). No, it is presented as if all readers of history had a common interest that historians serve to the best of their ability.

Columbus, the Indians, and Human Progress

To emphasize the heroism of Columbus and his successors as navigators and discoverers, and to deemphasize their genocide, is not a technical necessity but an ideological choice. It serves—unwittingly—to justify what was done.

My point is not that we must, in telling history, accuse, judge, condemn Columbus *in absentia*. It is too late for that; it would be a useless scholarly exercise in morality. But the easy acceptance of atrocities as a deplorable but necessary price to pay for progress (Hiroshima and Vietnam, to save Western civilization; Kronstadt and Hungary, to save socialism; nuclear proliferation, to save us all)—that is still with us. One reason these atrocities are still with us is that we have learned to bury them in a mass of other facts, as radioactive wastes are buried in containers in the earth.

The treatment of heroes (Columbus) and their victims (the Arawaks)—the quiet acceptance of conquest and murder in the name of progress—is only one aspect of a certain approach to history, in which the past is told from the point of view of governments, conquerors, diplomats, leaders. It is as if they, like Columbus, deserve universal acceptance, as if they—the Founding Fathers, Jackson, Lincoln, Wilson, Roosevelt, Kennedy, the leading members of Congress, the famous justices of the Supreme Court—represent the nation as a whole. The pretense is that there really is such a thing as “the United States,” subject to occasional conflicts and quarrels, but fundamentally a community of people with common interests. It is as if there really is a “national interest” represented in the Constitution, in territorial expansion, in the laws passed by Congress, the decisions of the courts, the development of capitalism, the culture of education, and the mass media.

“History is the memory of states,” wrote Henry Kissinger in his first book, *A World Restored*, in which he proceeded to tell the history of nineteenth-century Europe from the viewpoint of the leaders of Austria and England, ignoring the millions who suffered from those statesmen’s policies. From his standpoint, the “peace” that Europe had before the French Revolution was “restored” by the diplomacy of a few national leaders. But for factory workers in England, farmers in France, people of color in Asia and Africa, women and children everywhere except in the upper classes, it was a world of conquest, violence, hunger, and exploitation—a world not restored but disintegrated.

My viewpoint, in telling the history of the United States, is different: that we must not accept the memory of states as our own. Nations are not

A People's History of the United States

communities and never have been. The history of any country, presented as the history of a family, conceals fierce conflicts of interest (sometimes exploding, most often repressed) between conquerors and conquered, masters and slaves, capitalists and workers, dominators and dominated in race and sex. And in such a world of conflict, a world of victims and executioners, it is the job of thinking people, as Albert Camus suggested, not to be on the side of the executioners.

Thus, in that inevitable taking of sides which comes from selection and emphasis in history, I prefer to try to tell the story of the discovery of America from the viewpoint of the Arawaks, of the Constitution from the standpoint of the slaves, of Andrew Jackson as seen by the Cherokees, of the Civil War as seen by the New York Irish, of the Mexican War as seen by the deserting soldiers of Scott's army, of the rise of industrialism as seen by the young women in the Lowell textile mills, of the Spanish-American War as seen by the Cubans, the conquest of the Philippines as seen by black soldiers on Luzon, the Gilded Age as seen by southern farmers, the First World War as seen by socialists, the Second World War as seen by pacifists, the New Deal as seen by blacks in Harlem, the postwar American empire as seen by peons in Latin America. And so on, to the limited extent that any one person, however he or she strains, can "see" history from the standpoint of others.

My point is not to grieve for the victims and denounce the executioners. Those tears, that anger, cast into the past, deplete our moral energy for the present. And the lines are not always clear. In the long run, the oppressor is also a victim. In the short run (and so far, human history has consisted only of short runs), the victims, themselves desperate and tainted with the culture that oppresses them, often turn on other victims.

Still, understanding the complexities, this book will be skeptical of governments and their attempts, through politics and culture, to ensnare ordinary people in a giant web of nationhood pretending to a common interest. I will try not to overlook the cruelties that victims inflict on one another as they are jammed together in the boxcars of the system. I don't want to romanticize them. But I do remember (in rough paraphrase) a statement I once read: "The cry of the poor is not always just, but if you don't listen to it, you will never know what justice is."

I don't want to invent victories for people's movements. But to think that history writing must aim simply to recapitulate the failures that dominate the past is to make historians collaborators in an endless cycle of defeat. If history is to be creative, to anticipate a possible future without

Columbus, the Indians, and Human Progress

denying the past, it should, I believe, emphasize new possibilities by disclosing those hidden episodes of the past when, even if in brief flashes, people showed their ability to resist, to join together, occasionally to win. I am supposing, or perhaps only hoping, that our future may be found in the past's fugitive moments of compassion rather than in its solid centuries of warfare.

That, being as blunt as I can, is my approach to the history of the United States. The reader may as well know that before going on.

What Columbus did to the Arawaks of the Bahamas, Cortés did to the Aztecs of Mexico, Pizarro to the Incas of Peru, and the English settlers of Virginia and Massachusetts to the Powhatans and the Pequots.

It seems there was a frenzy in the early capitalist states of Europe for gold, for slaves, for products of the soil, to pay the bondholders and stockholders of the expeditions, to finance the monarchical bureaucracies rising in Western Europe, to spur the growth of the new money economy rising out of feudalism, to participate in what Karl Marx would later call "the primitive accumulation of capital." These were the violent beginnings of an intricate system of technology, business, politics, and culture that would dominate the world for the next five centuries.

Jamestown, Virginia, the first permanent English settlement in the Americas, was set up inside the territory of an Indian confederacy, led by the chief, Powhatan. Powhatan watched the English settle on his people's land, but did not attack, maintaining a posture of coolness. When the English were going through their "starving time" in the winter of 1610, some of them ran off to join the Indians, where they would at least be fed. When the summer came, the governor of the colony sent a messenger to ask Powhatan to return the runaways, whereupon Powhatan, according to the English account, replied with "noe other than prowde and disdaynefull Answers." Some soldiers were therefore sent out "to take Revendge." They fell upon an Indian settlement, killed fifteen or sixteen Indians, burned the houses, cut down the corn growing around the village, took the queen of the tribe and her children into boats, then ended up throwing the children overboard "and shoteinge owtt their Braynes in the water." The queen was later taken off and stabbed to death.

Twelve years later, the Indians, alarmed as the English settlements kept growing in numbers, apparently decided to try to wipe them out for good. They went on a rampage and massacred 347 men, women, and children. From then on it was total war.

A People's History of the United States

Not able to enslave the Indians, and not able to live with them, the English decided to exterminate them. According to historian Edmund Morgan, “Within two or three years of the massacre the English had avenged the deaths of that day many times over.”

In that first year of the white man in Virginia, 1607, Powhatan had addressed a plea to John Smith that turned out prophetic. How authentic it is may be in doubt, but it is so much like so many Indian statements that it may be taken as, if not the rough letter of that first plea, the exact spirit of it:

I have seen two generations of my people die. . . . I know the difference between peace and war better than any man in my country. Why will you take by force what you may have quietly by love? Why will you destroy us who supply you with food? What can you get by war? Why are you jealous of us? We are unarmed, and willing to give you what you ask, if you come in a friendly manner, and not so simple as not to know that it is much better to eat good meat, sleep comfortably, live quietly with my wives and children, laugh and be merry with the English, and trade for their copper and hatchets, than to run away from them, and to lie cold in the woods, feed on acorns, roots and such trash, and be so hunted that I can neither eat nor sleep.

When the Pilgrims came to New England, they too were coming not to vacant land but to territory inhabited by tribes of Indians.

The Pequot Indians occupied what is now southern Connecticut and Rhode Island. The Puritans wanted them out of the way; they wanted their land. So, the war with the Pequots began. Massacres took place on both sides. The English developed a tactic of warfare used earlier by Cortés and later, in the twentieth century, even more systematically: deliberate attacks on noncombatants for the purpose of terrorizing the enemy.

So the English set fire to the wigwams of villages. William Bradford, in his *History of the Plymouth Plantation* written at the time, describes John Mason's raid on the Pequot village:

Those that scaped the fire were slaine with the sword; some hewed to peeces, others rune throw with their rapiers, so as they were quickly dispatchte, and very few escaped. It was conceived they thus destroyed about 400 at this time. It was a fearful sight to see them thus frying in the fyer.

A footnote in Virgil Vogel's book *This Land Was Ours* (1972) says: “The official figure on the number of Pequots now in Connecticut is twenty-one persons.”

Columbus, the Indians, and Human Progress

For a while, the English tried softer tactics. But ultimately, it was back to annihilation. The Indian population of ten million that lived north of Mexico when Columbus came would ultimately be reduced to less than a million. Huge numbers of Indians would die from diseases introduced by the whites.

Behind the English invasion of North America, behind their massacre of Indians, their deception, their brutality, was that special powerful drive born in civilizations based on private property. It was a morally ambiguous drive; the need for space, for land, was a real human need. But in conditions of scarcity, in a barbarous epoch of history ruled by competition, this human need was transformed into the murder of whole peoples.

Was all this bloodshed and deceit—from Columbus to Cortés, Pizarro, the Puritans—a necessity for the human race to progress from savagery to civilization?

If there *are* necessary sacrifices to be made for human progress, is it not essential to hold to the principle that those to be sacrificed must make the decision themselves? We can all decide to give up something of ours, but do we have the right to throw into the pyre the children of others, or even our own children, for a progress that is not nearly as clear or present as sickness or health, life or death?

Beyond all that, how certain are we that what was destroyed was inferior? Who were these people who came out on the beach and swam to bring presents to Columbus and his crew, who watched Cortés and Pizarro ride through their countryside, who peered out of the forests at the first white settlers of Virginia and Massachusetts?

Columbus called them Indians, because he miscalculated the size of the earth. In this book we too call them Indians, with some reluctance, because it happens too often that people are saddled with names given them by their conquerors.

Widely dispersed over the great land mass of the Americas, they numbered approximately seventy-five million people by the time Columbus came, perhaps twenty-five million in North America. Responding to the different environments of soil and climate, they developed hundreds of different tribal cultures, perhaps two thousand different languages. They perfected the art of agriculture and figured out how to grow maize (corn), which cannot grow by itself and must be planted, cultivated, fertilized, harvested, husked, and shelled. They ingeniously developed a variety of other vegetables and fruits, as well as peanuts and chocolate and tobacco and rubber.

On their own, the Indians were engaged in the great agricultural revolution that other peoples in Asia, Europe, and Africa were going through about the same time.

While many of the tribes remained nomadic hunters and food gatherers in wandering, egalitarian communes, others began to live in more settled communities where there was more food, larger populations, more divisions of labor among men and women, more surplus to feed chiefs and priests, more leisure time for artistic and social work, for building houses.

From the Adirondacks to the Great Lakes, in what is now Pennsylvania and upper New York, lived the most powerful of the northeastern tribes, the League of the Iroquois. In the villages of the Iroquois, land was owned in common and worked in common. Hunting was done together, and the catch was divided among the members of the village.

Women were important and respected in Iroquois society. The women tended the crops and took general charge of village affairs while the men were always hunting or fishing. As Gary B. Nash notes in his fascinating study of early America, *Red, White, and Black*, "Thus power was shared between the sexes and the European idea of male dominance and female subordination in all things was conspicuously absent in Iroquois society."

Children in Iroquois society, while taught the cultural heritage of their people and solidarity with the tribe, were also taught to be independent, not to submit to overbearing authority.

All of this was in sharp contrast to European values as brought over by the first colonists, a society of rich and poor, controlled by priests, by governors, by male heads of families. Gary Nash describes Iroquois culture:

No laws and ordinances, sheriffs and constables, judges and juries, or courts or jails—the apparatus of authority in European societies—were to be found in the northeast woodlands prior to European arrival. Yet boundaries of acceptable behavior were firmly set. Though priding themselves on the autonomous individual, the Iroquois maintained a strict sense of right and wrong.... He who stole another's food or acted invalourously in war was "shamed" by his people and ostracized from their company until he had atoned for his actions and demonstrated to their satisfaction that he had morally purified himself.

Not only the Iroquois but other Indian tribes behaved the same way.

So, Columbus and his successors were not coming into an empty wilderness, but into a world which in some places was as densely populated as Europe itself, where the culture was complex, where human rela-

Columbus, the Indians, and Human Progress

tions were more egalitarian than in Europe, and where the relations among men, women, children, and nature were more beautifully worked out than perhaps any place in the world.

They were people without a written language, but with their own laws, their poetry, their history kept in memory and passed on, in an oral vocabulary more complex than Europe's, accompanied by song, dance, and ceremonial drama. They paid careful attention to the development of personality, intensity of will, independence and flexibility, passion and potency, to their partnership with one another and with nature.

John Collier, an American scholar who lived among Indians in the 1920s and 1930s in the American Southwest, said of their spirit: "Could we make it our own, there would be an eternally inexhaustible earth and a forever lasting peace."

Perhaps there is some romantic mythology in that. But even allowing for the imperfection of myths, it is enough to make us question, for that time and ours, the excuse of progress in the annihilation of races, and the telling of history from the standpoint of the conquerors and leaders of Western civilization.

Exercises

1. Before reading the chapter: Write down all that you think you know about Columbus, including myth as well as reality. Examples: Columbus sailed in 1492; people believed the earth was round; Columbus sailed on three ships.

While or after reading the chapter: Write down passages in the text that either support or contradict each item generated by the assignment above, then identify those events and actions discussed in the text that had not been part of your thinking about Columbus originally.

2. After reading the first chapter, choose two adjectives that describe Columbus, two that describe the Spanish, two that describe the English, two for the Arawaks, and two for the Powhatans. You may use the same adjective for more than one group. *Do not feel confined to using only the adjectives listed.*

CRUEL	NAIVE	HONEST	GREEDY
GENEROUS	KIND	BRAVE	IGNORANT
CIVILIZED	ADVENTUROUS	PRIMITIVE	INFERIOR
PRACTICAL	INTELLIGENT	HEROIC	THOUGHTFUL
ARROGANT	LAZY	DEDICATED	

For each of the adjectives you choose:

- a. Write down the definition that best describes the applicable group.
- b. Write ten short sentences using the selected adjectives—one adjective for each sentence. For example:
 - ★ The Spanish were generous.
 - ★ Columbus was brave.
 - ★ The Arawaks were generous.
- c. Then look for details/facts in the text that you think illustrate the definitions of the selected adjectives.

Important: In defining a word, you cannot use any part of that word in the definition. Furthermore, useful definitions for this exercise will be ones that do not employ the opposite of the word. An example of a useless definition would be: primitive = not civilized. The problem here is what does “civilized” mean? Not primitive? If you have a dictionary that gives you such circular definitions, go find a more detailed dictionary or use a thesaurus.

3. Choose an infinitive to finish each of the sentences below.
 - a. Use a dictionary to define the infinitive.
 - b. Look for details/facts in the text that you think illustrate the definitions.

The purpose of Columbus’s voyage(s) was...

The result of Columbus’s voyage(s) was...

Some options: to civilize, to explore, to exploit, to conquer, to establish trade, to discover, to Christianize, to destroy, to convert, to destroy...

4. Write down the five most important things Zinn says about Columbus (include page numbers). Write down the two most important things he says about the writing of history.

Compare your list with a classmate(s). Why are your lists different? What are the criteria you each used in making your choices? [This is a real brainteaser.]

5. Was Columbus responsible for the behavior of his men?
 - a. Identify what the soldiers' behaviors were.
 - b. For each act, identify what Columbus could or could not have done to alter that behavior.

6. Compare Columbus's log entries with Las Casas's journal entries.
 - a. Identify differences and similarities (e.g., how each describes the Arawaks).
 - b. Identify topics the other did not discuss.
 - c. What accounts for the differences? the similarities (their personalities, their goals, their job functions, their status in relation to the other Spaniards)?

7. Write a two-page story of Columbus that you would want read to a third-grade class at the point when the students are first being introduced to Columbus.

8. For each of the suggested phrases below that completes the sentence, identify the passage(s) in the book that either supports or challenges each assertion. Identify irrelevant phrases with NP (no passage applies). When choosing a relevant passage, note its page number and whether the passage supports, challenges, or doesn't apply.

Zinn thinks that Morison....

 - a. omits the truth.
 - b. believes that all readers share a common interest.
 - c. writes the kind of history that allows atrocities to continue to be committed.
 - d. is critical of Columbus.
 - e. idealizes Columbus.
 - f. is as accurate as a mapmaker.

- g. allows his opinions of Columbus to select out only the positive.
 - h. buries the negative facts with positive facts.
 - i. omits the bloodshed.
9. If communities share common interests, did Columbus and Las Casas belong to the same community? If so, what are their common interests? (What was Columbus in the Caribbean for? Las Casas?) If not, what interests separate them into different communities? Did Las Casas have more in common with the Arawaks than he did with Columbus?
10. Zinn argues (p. 10) that most history texts pretend that there is such a thing as “The United States”—a community of people with common interests.
- a. What are the “communities” that Zinn identifies? What “interests” do you think these groups have in common? What “interests” do they not share? What “interests” of one group might be in opposition to an “interest” of another group?
 - b. Identify the community that you belong to, your community’s interests, and other communities that share your interests, as well as those communities that do not share or oppose your interests (possibilities: students, teachers, administrators, male, female, young, old, ethnic and racial identities, neighborhood, city, suburb). Do the policies of the United States government favor some communities over others?
11. Brainstorming from details:
- a. Choose a detailed description of an event from the text.
 - b. Then write down a series of questions that knowledge of the event may enable one to answer.
 - c. Choose two of the questions and answer them.

Example

- a. *detailed description of an event from the text:* on page 5, Columbus “got into a fight with Indians who refused to trade as many bows and arrows as he and his men wanted. Two [Indians] were run through with swords and bled to death.”

- b. *a series of questions that knowledge of the above event may enable one to answer:* What does the above event reveal about Columbus's personality? about the purpose of the voyage? about Spanish culture? about Arawak culture? about the comparative military strength of the Spanish and Arawaks?
- c. *answers to two of the questions above:* The Spanish had military superiority—swords versus bows and arrows. Columbus wanted to dictate the terms of trade.

12. Hollywood Movies: Fact or Fiction? Much controversy has surrounded the making of the films *Mississippi Burning* and *JFK*. Many critics complain that when Americans see these films, they will believe falsely that the events and circumstances dramatized in these films accurately represent what happened during the periods in question. And for unstated reasons, this is wrong. The Left has criticized *Mississippi Burning* for leaving the impression that the FBI was honestly trying to help the civil rights advocates when “in fact” the FBI was aiding the KKK. Most of the mainstream media excoriated *JFK* for implying that John Kennedy's assassination was engineered by Lyndon Johnson. Several questions are begged by this criticism. Do fictional movies (as opposed to documentaries) have a responsibility to reflect history accurately? Or do they have poetic license with reality, as art claims to have, in order to make a point about universal truth? But, more to the point with regard to Columbus, is “history” accurate? If films are supposed to convey “accurate” history, who decides what is the official version of the past? In order to explore this issue in more depth:

- a. Watch a movie made about Columbus.
- b. Compare the content of the movie with Zinn's chapter about Columbus in addition to any other historical sources you may wish to consult (the more the better).

Possible points comparison: reasons for the voyage, Columbus's first perceptions of the native inhabitants, Spanish treatment of the native inhabitants, success of the voyage(s), failures of the voyage(s), degree of Columbus's navigational skills, Columbus's leadership skills, the nature of the reception of Columbus by the native inhabitants, the portrayal of native inhabitants.

c. Respond to any of the questions raised in the introduction to this assignment above. For example:

- ★ Is the movie historically accurate?
- ★ Is the movie good art?
- ★ Does the movie have a thesis?
- ★ Does it address a universal truth?
- ★ What is the difference between history and art?
- ★ Is the difference merely one of style?
